

SAI KUMAR VAYALA

Integration Engineer

📍 Pottisubhai palem, 523187 Chirala, India ✉ saikumarvayala@gmail.com 🌐 vayala-saikumar

PROFILE

I am a certified MuleSoft, Oracle Integration cloud and workato integrations developer with 4+ years of experience. My expertise includes designing and developing APIs, implementing integrations, and ensuring seamless data flow between various applications and systems using MuleSoft's Anypoint Studio, Oracle Integration Cloud Service, and workato platform. I have worked on projects in diverse domains such as finance, marketing, healthcare, Data ingestions both ETL, ELT to Databricks and e-commerce. I possess excellent communication, problem-solving, and team collaboration skills, enabling me to work effectively with cross-functional teams and resolve complex integration challenges. My commitment to delivering high-quality integration solutions that meet business objectives and improve overall efficiency drives my passion for developing scalable and robust integration solutions.

WORK EXPERIENCE

Integration engineer

Coursera

07/2023 – present
India

As an Integration Engineer at Coursera, I engineered and maintained crucial integrations, automating internal processes and optimizing data flow. I migrated 10+ business-critical projects from MuleSoft to Workato, significantly enhancing system efficiency and reducing operational overhead. My expertise included real-time and bulk integrations with Databricks, Salesforce, Braze, and SurveyMonkey, leveraging Workato with Python scripting and AWS Lambda for complex functions. I also created a CI/CD pipeline for Workato via Slack, ensuring efficient and reliable recipe deployment. I consistently delivered innovative solutions by actively collaborating with stakeholders to translate complex business needs into clear technical designs.

Staff Consultant

Apps Associates

04/2023 – 06/2023
Hyderabad

I have extensive experience working on multiple projects and leveraging various integration tools such as MuleSoft, Oracle Integration Cloud (OIC), and Workato. My expertise encompasses Oracle HCM modules, including Finance (General Ledger, Accounts Payable, Accounts Receivable), HRMS (Accounts, Contacts), and Salesforce integration. I am proficient in handling diverse file types, including SFTP, XML, and CSV, ensuring seamless data exchange across various platforms.

Associate Consultant

Apps Associates

01/2022 – 03/2023
Hyderabad

As an Associate Consultant, I've actively contributed to multiple projects, applying my growing expertise in integration tools like MuleSoft, Oracle Integration Cloud (OIC), and Workato. I also had the opportunity to spearhead the organization's first Workato implementation. My experience extends to Oracle HCM modules, alongside Salesforce integrations. I'm adept at managing various file types, such as SFTP, XML, and CSV, to facilitate smooth data exchange across diverse platforms.

Associate Trainee

Apps Associates

01/2021 – 12/2021
Hyderabad, India

As a trainee, I became proficient in Mulesoft, Workato, and OIC, quickly adapting to their diverse functionalities. I applied these skills to develop robust API integrations and automate critical workflows, significantly enhancing data flow and system efficiency. My proactive and rapid learning approach enabled me to deliver impactful solutions consistently from the outset.

EDUCATION

BTech (CSE)

Narasaraopeta Engineering College

07/2016 – 03/2020
Narasaraopeta, India

Intermediate (Computers)

Kendriya Vidyalaya

06/2014 – 03/2016
Visakhapatnam, India

SKILLS

- Workato Automation cloud
- Dell Boomi Cloud
- Java Programming
- Oracle SQL DB
- Salesforce
- MuleSoft Anypoint Platform
- Android Application Development
- C Programming
- Databricks EDS Ingestions
- Prompt Engineering Chat GPT
- Oracle Integration Cloud
- Python Programming
- Microsoft SQL Server
- REST and SOAP webservice

LANGUAGES

English ● ● ● ● ● Telugu ● ● ● ● ●
Hindi ● ● ● ● ●

CERTIFICATES

- Oracle Cloud Platform Application Integration 2021 Certified Specialist
- Boomi Associate Developer 2022
- Mulesoft Certified Developer Level 1
- Boomi Professional Developer 2023
- Workato Automation Pro I ,II & III Certification
- Android Developer Nano Degree by Udacity
- Enterprise Automation by Workato
- Integration Developer Certification by Workato

PROJECTS

Social Media Analytics Integration

01/2025 – 03/2025

Linkedin & TikTok

This project integrates LinkedIn and TikTok analytics into the Databricks (EDS). This enables Data Scientists to create dashboards, providing key metrics that guide the marketing team in optimizing content strategy based on user engagement analytics.

Salesforce integrations

11/2024 – 12/2024

This project is built between different Salesforce instances of the coursera and enables the data consistency across all instances.

Migration Project

01/2024 – 12/2025

Mulesoft To Workato

This is a significant project, with the primary objective being the migration of all existing MuleSoft integrations into Workato, while ensuring the business logic remains intact. I have successfully migrated 10 business-critical and complex pipelines to Workato without any disruption to the underlying business processes in the span of 9 months. The project encompasses real-time, scheduled, and API-based integrations, seamlessly connecting various platforms such as Salesforce, Databricks, SurveyMonkey, S3 Bucket, and Trulio, among others. The completion of the migration project before the time saved 400K USD for coursera.

Braze integration

08/2023 – 03/2024

Salesforce to Braze marketing

This enabled the coursera to send the promotional and confirmation emails to the users on their enrollment and interest. This also enable the marketing team to follow up on the users who showed interest on degree enrollments.

AR & AP Invoices Integrations

10/2022 – 06/2023

I have built Integrations using OIC for various payment sources to Oracle finance cloud.

AP,AR Invoice & GL Integrations

03/2022 – 09/2022

I have built various integrations for AP Invoice and GL Journal Creation in Oracle Fusion based on different source systems using the Oracle Integration Cloud.

Salesforce Opportunity and Oracle Sales Order Integration

01/2022 – 03/2022

I have Built Integration in OIC for Integration SFDC opportunities with the Oracle Sales Order based on the DFF value which contains SFDC opportunity id

Concur to Oracle Fusion AP & GL Integration

11/2021 – 01/2022

I have built Integrations in Workato for Creating AP Invoices and GL Journals from the concur file to the Oracle fusion

Google Cloud Platform to Salesforce Integration

05/2021 – 09/2021

I have Built Integrations in Mulesoft for bi-directional communication between SFDC and GCP

COURSES

Project Management Specialization

02/2025 – 04/2025

University of Colorado Boulder

This is a Project Management specialization on Coursera, consisting of three courses. It is a 2-month online program provided by the University of Colorado Boulder.

Android Nano Degree by APSSDC

02/2019 – 03/2019

Udacity

This is a 4-week Nano Degree course in Android development, during which I successfully completed six projects, including one major capstone project. The course was offered by Udacity in collaboration with Google and APPSSDC.

Gen AI Foundations

08/2024 – 04/2025

Coursera

This learning path on Coursera consists of five courses related to Generative AI and Prompt Engineering certifications, along with several AI courses that provide a fundamental understanding of Generative AI.
